Nursing
The functions of each Nurse center around the health of each student. The Nurse administers first aid, is responsible for the administration of medication, and reviews and maintains current health and immunization records. The Nurse serves as a medical consultant to the ECE staff, families and partnering programs. When indicated the Nurse can function as a part of the student’s health care team and be an advocate for the student and/or family. In this role the Nurse may attend doctor or clinic as needed and with parent permission. Nursing staff provides ongoing staff in-services and support to families. Our nursing staff maintain compliance with State regulations related to medical records and procedures.
